With respect to a document,  
re: "Utah Attorney General is pursuing harsher punishment..."

And, a following response,  
re: "The Judge in the Microsoft case ... will decide whether  
additional (or different) remedies are appropriate..."

As an Systems Administrator working with microsoft products has been  
both, positive and negative. But, the Antitrust Case needs to be  
resolved. I have personally noted that Microsoft is taking over  
other software vendors ideas and thus their product, due to the  
'ownership of the only viable computer OS on the market to-day'.  
Other vendors can't possibly compete with such a giant, I think our  
Fore Fathers addressed this issue.
